

Love for Logan

BONE MARROW DRIVE

Logan James Parker, needs a perfectly-matched bone marrow donor to save his life from a very rare form of Leukemia. If you are between the ages of 18 & 60, please be tested to determine if you are that match. The process is a simple swab of the inside of your cheeks. Please ask everyone you know to come out and help this little boy find

his match so that he can battle Leukemia and WIN!

(If you are not between 18 & 60 - please bring someone who is!)
